

DIGITAL SIGNATURE PLATFORM

www.dijitalimza.com.tr

All signature are covered, in one platform

It is an online signing platform that combines all paperless signing methods that can be used by individuals, institutions and organizations that need to sign any document or send it to another recipient upon signing.

How It Works

The sender uploads the documents to be signed or sent to another person to be signed, together with the information of the person to be signed, into the system.

The sender decides which signing method to use.

Signatory persons are informed via SMS / E-mail and their access information to the platform is shared.

STOP PAPER COST

Eliminate your paper expense spent in signature processes. Complete your signature processes comfortably without using paper.

NO NEED FOR COURIER

There is no longer any courier delivery fee for signed documents. Complete your signature processes without intervening delivery time.

LESS TIME CONSUMED

For days and weeks Remove incomplete signature processes from your life. Complete your signature processes quickly, reliably and easily.

25m+

More than 25 million documents are signed each year using digital signature methods.

100b+

More than 100 thousand documents are sent digitally by tens of thousands of people per day.

₺150m+

By using digital signature methods, more than ₺150 million savings are provided to the national economy.

Where the Digital Signature Platform can help you?

DSP (Digital Signature Platform) is available for both individuals and institutions & companies.

Common areas of usage:

- ✓ Banking operations
- ✓ Contracts
- ✓ Supply chain management processes -
- ✓ Accounting operations
- ✓ HR processes
- ✓ Government correspondance
- ✓ Expertise reports

Banking operations

Perform all your banking transactions that require wet signature, save time and paper consumption.

Contracts

Do not waste time on contracts waiting to be signed at the desks of customers, managers or to be picked up from the cargo. Manage your contracts digitally and formally without the hassle of paperwork.

Supply chain management processes

From supplier contracts to your purchasing processes, sign your documents with the digital signature method you want, request documents from your suppliers with digital signatures, digitize your processes, reduce errors.

Accounting operations

Sign, send and archive all your documents digitally and with all digital signature options.

HR processes

NDA, employee contract and other employee documents can be sent and signed remotely.

Expertise reports

Sign, share and archive hundreds of documents with the ease of signing a single document and with the digital signature method you want.

Government correspondance

Thanks to our user-friendly interface, you can manage official correspondence and signature processes from your own computer, mobile device or tablet without dealing with technical details (Java, .Net, AKIS).
